

Tired of being asked, "Isn't that scope back yet?!"
Check out these scope repair turnaround times . . .

5.8 hours to complete minor repairs!

18.4 hours for major repairs!

That's what the scope repair experts at Bronch Tech average.
And since 90% of your repair needs are usually "minor,"
you can enjoy SAME DAY service, too!

Think of it. You'll have . . .

- less down time
- fewer complaints from physicians
- less patient juggling
- and fewer loaners to track down

**. . . all at a lower cost
than other repair services**

And we can prove our performance to you. We have to track repair turnaround stats as part of our quality control and assurance process. In order to keep our quality management and process registration (ISO 13485), we have rigorous checks and cross-checks to assure:

- **We can track and analyze the status of your scopes**, including turn time
- **Our technicians are thoroughly trained** to perform both basic and sophisticated repairs on all models and makes of scopes
- **You get only FDA Class VI approved parts** that meet your specifications
- **Your repaired scope is quality-inspected twice** before it leaves our facility
- **You can talk to a service rep at any time** to ask questions or make requests

By the way, no other scope repair facility in the country under goes the rigor to earn these quality certifications. And to make sure you're satisfied with your repair, **you get a 120-day satisfaction guarantee on all service work we do.** We won't be satisfied until you're satisfied.

Bronch Tech

See for yourself just how quick
good scope repair can be.
